**His Heirs Divide the Fortune; Daughter Who Was Not Provided Gets Half of \$1,245,000 Estate.**

MILAN, Italy.—The heirs of Enrico Caruso, noted tenor, who have been meeting at Florence to review the fortune garnered in America by the famous singer, today estimated Caruso's Italian fortune would amount to the \$9 million lire, or \$1,245,000 at the present low rate of Italian exchange. In addition there is an annual income of \$100,000 from the Victor-Phonograph company, but that sum may be compromised since Caruso only has 25 song discs on his contract which called for forty recorded songs.

The Caruso heirs decided to divide the fortune into two equal portions—one-half going to Caruso's infant daughter, Gloria, who was not provided for in the will, and the other half being equally divided among the widow, Caruso's two sons by a former marriage and a brother of the late singer.
